SHAQUIB WASIF

Computer Science & Engineering Student

Dhaka, Bangladesh | sushmit.ssc21@gmail.com | GitHub | LinkedIn | Portfolio | itch.io

PROFILE

Computer Science and Engineering student at the Islamic University of Technology with interests in software development, game development, computer graphics, cybersecurity, and interactive storytelling.

Experienced in building Java, C/C++, JavaFX, and game-development projects through academic and personal work. Through class projects, I have also gained experience collaborating with teammates, dividing tasks, integrating different parts of a project, and working together toward a shared implementation.

Currently seeking an internship opportunity where I can gain practical industry experience, contribute to real-world software projects, learn from experienced developers, and further develop my technical and teamwork skills.

EDUCATION

B.Sc. in Computer Science and Engineering 2024 – 2028
Islamic University of Technology (IUT)
Current status: 2nd Year, 2nd Semester

Higher Secondary Certificate (HSC) GPA: 5.00
Notre Dame College

Secondary School Certificate (SSC) GPA: 5.00
Monipur High School & College

TECHNICAL SKILLS

Languages: C, C++, Java, JavaScript, SQL

Frameworks / Libraries / Engines: JavaFX, LibGDX, React, Vite, Godot

Tools: Git, GitHub, Gradle, Tiled, Scene Builder, Eclipse, MySQL

Areas of Interest: Game Development, Computer Graphics, Software Engineering, Cybersecurity, Database Systems, Interactive Storytelling, AI-assisted Development

PROJECTS

Deadline Dash — *2D Campus Adventure Game (In Progress)* GitHub
Java · LibGDX · Tiled · Gradle
A 2D Pokémon-style campus adventure game set on the IUT campus, focused on exploration, storytelling, NPC interaction, and quests. Features campus exploration, NPC dialogue, a quest system, inventory and wallet economy, story progression, multiple maps, and event-driven game architecture.

farmOS — *CLI Farm Management System (Completed)*
C · C++
A command-line farm management system focused on structured data management, file handling, command-line interaction, and practical software organization.

Netflix Copy — *Class / Learning Project*
JavaFX · Scene Builder · Eclipse · CSS
A JavaFX class project created while learning desktop GUI development, recreating the interface structure and visual style of a streaming platform. Focus areas: JavaFX UI development, Scene Builder, CSS styling, and event-driven desktop interfaces.

ChatKor — *Class / Learning Project*
JavaFX · Scene Builder · Eclipse · CSS
A JavaFX class project exploring chat-oriented interface design, UI composition, event handling, and CSS styling while learning desktop application development.

Stories — *Class / Learning Project*
JavaFX · Scene Builder · Eclipse · CSS · MySQL · JDBC
A JavaFX social-story style application featuring a story interface, story viewing with timed transitions, and database-backed users and stories via MySQL/JDBC integration.

INTERESTS

Game Development · Storytelling · Computer Graphics · Cybersecurity · Artificial Intelligence · Anime · Interactive Media
